Dear Mr. Khare:

The manuscript entitled "Transforming Customer Behavior and Promoting Sustainability: Exploring Insights on Influencer-Driven Paradigm Shift with a Social Media Analytics Approach in Cell phone and E-Auto industries" has been submitted to IEEE Access. Since your expertise is relevant to this article, we would be grateful if you would consider reviewing it.

The abstract appears at the end of this letter, along with the names of the authors. Please let me know within 2 days if you will be able to accept my invitation to review. If you agree to review, we ask that you provide your review comments within **7 days** to assist IEEE Access in maintaining its expedited peer review process of 4 to 6 weeks. If you are interested in reviewing but need additional time to complete the review, we can grant a reasonable deadline extension upon request. For additional information on IEEE Access and tips on completing a quality review, please visit our [Reviewer Best Practices guide](#).

After completing the review, you can easily receive credit on your Publons profile.

As a reviewer, you will need to provide an Accept or Reject recommendation with comments.

When reviewing the article, keep in mind the following IEEE Access qualities:

1. The article must be technically sound.
2. The article must be original writing that enhances the existing body of knowledge in the given subject area. However, review articles and surveys are acceptable if they add value, even if new data/concepts are not presented.
3. Applied research articles are acceptable if they are useful to the engineering community on how to demonstrate a technology that may not be novel.
4. The references that are provided must be applicable and sufficient.
5. The title is applicable and appropriate.

To reply to this reviewer invitation, please click the link below to register with our online manuscript review system, or you may email me with your reply. If you are unable to review at this time, I would appreciate your recommendation for another expert reviewer.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

Agreed: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=f384fea06c7c405baf2e25a4a88f0cf1

Declined: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=0bd3faac61264c6cbd5626e016c47795

Once you accept my invitation to review this manuscript, you will be notified via email with directions on how to access the manuscript and the reviewer instructions in the Reviewer Center.

Thank you for your assistance with the peer review of this IEEE Access article.

Sincerely,

Prof. Derek Abbott
Editor-in-Chief, IEEE Access

TITLE: Transforming Customer Behavior and Promoting Sustainability: Exploring Insights on Influencer-Driven Paradigm Shift with a Social Media Analytics Approach in Cell phone and E-Auto industries

AUTHORS: Mohammadian, Noushin; Vallai, Omid Fatahi

ABSTRACT: The importance of social media is increasing continuously considering its popularity and its impact on customers' behavior. Moreover, research studies are showing that the influencers are receiving attention and support from users. By increasing the loyalty of influencers, the impression they can have on users, become more interesting for researchers. This study has focused on capabilities behind the social media analytics and the influencer roles in affecting customer behaviors. The study investigates these capabilities and elaborates a system dynamics model which instills these capabilities through omnichannel touchpoints through PLM cycles for promoting sustainability into customer behavior models. Social Media Analytics is considered as the core concept for integrating influencer roles into touch points which the customers interact with social media especially in Omnichannel strategy. Analyzing the developed causal model, the interaction of agents and effecting parameters and different scenarios for analyzing the influencer driven paradigm shift have been discussed with case study models over Cell phone and E-Auto industry cases. The results highlight the capabilities of influencer driven trends for consumer behavior paradigm shift over social media platforms for emerging toward sustainability perspectives.

Per Section 8.2.1.C.4 of the IEEE PSPB Operations Manual, information contained in an article under review is confidential and shall not be shared with others, nor shall reviewers use non-public information contained in an article to advance their own research or financial interests.

Per Section 8.2.2.A.2 of the IEEE PSPB Operations Manual, all editors and referees shall immediately DECLINE from review of articles in which there exists a conflict of interest.

If you have any questions, please contact the article administrator: Ms. Ritika Gupta ritika.gupta@ieee.org. In addition, if you would like to get a certificate after completing this review, please send an email to ieeeaccess@ieee.org.
