Beyond Momentum + Q&A

Business Goals

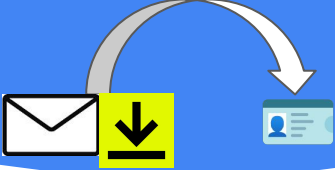

Agreement Orchestration + Identify

- 🎯 Enable customers to easily adopt more DocuSign products
- 🎯 Improve customer and partner satisfaction by making DocuSign experience more seamless, more integrated, and self serve
- 🎯 Increase agreement process efficiency and reduce churn by making the agreement processes better orchestrated by DocuSign Products
- 🎯 **Streamline Identify in DAP by making it central to any agreement journey**
- 🎯 **Increase Agreement attach rate by making Identify easily pluggable to any agreement journey**

Product Strategy

We are making Identify more modular, and independent of envelopes(eSign)

Web Forms	Identify	Sign	
Identify	Web Forms	Sign	
Identify	Web Forms	CLM	DocGen

Identify will be easily pluggable during any step of agreement journey

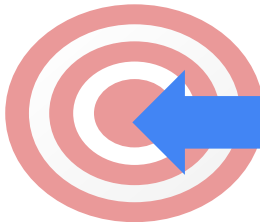

Identify as a Service -> will not be limited to work with specific products

Billing and Reporting outside eSign/Envelope context

Branding

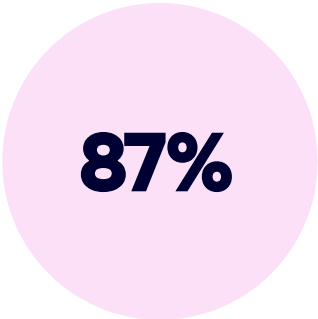

ID Evidence

> 9% attach rate for Agreement Orchestration transactions

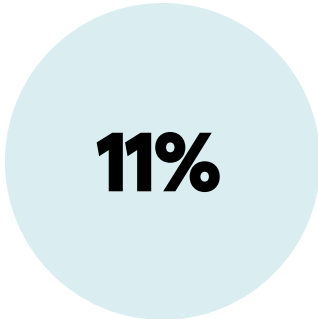

Why Agreement Orchestration?

Customers have digitized their signing today, but have not automated their agreement journey end to end. Most customers use DocuSign as a point solution to a signature.

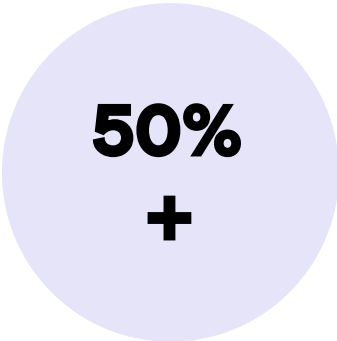

87%

B2B enterprise customers
with **manual processes**

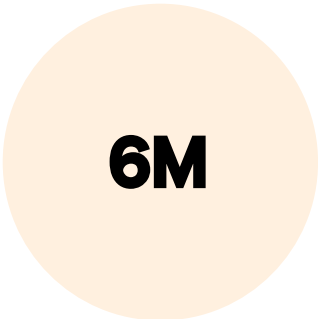

11%

Agreement journey has
DocuSign presence today

**50%
+**

Agreement steps that can be
mapped to DocuSign products

6M

Agreement actions
executed in 1 year with 9M
envelopes processed

Vision/Mission

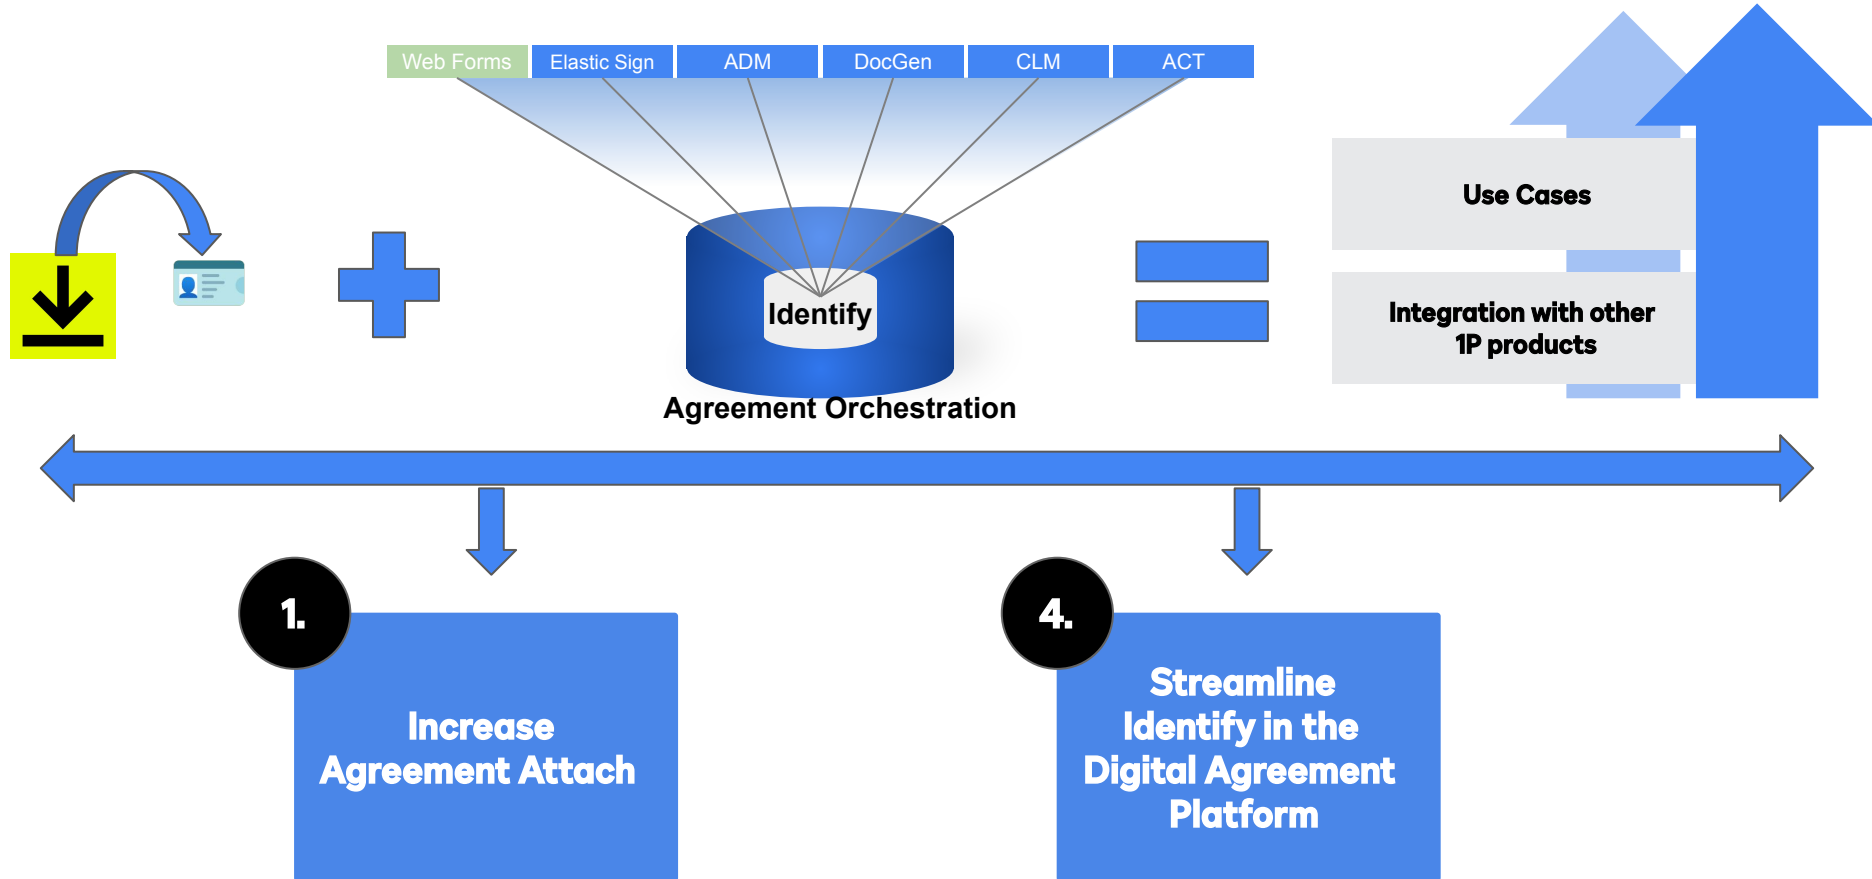

Vision

To be the Earth's most preferred solution where companies can digitize their Agreement journeys

Mission

Build a cohesive orchestration platform which integrates all DocuSign 1P and 3P products for customers to digitize their agreement journeys end to end

Why Identify + Agreement Orchestration?

Supported Scenarios/Use Cases

Use Cases

Self-service Loan Application

Patient Intake/New Outpatient Registration

Insurance sign up/claims

Credit Card Application

Integration Scenarios

Web Forms + Identify + Sign (embedded and send)

Web Forms + Identify + Elastic Sign

Identify + Web Forms + Sign (embedded and send)

Identify + Web Forms + Elastic Sign

Scope and Solution

Agreement Process Creator

🔑 As an Agreement Process Creator, I want to be able to add the “Identify” at any step in my workflow, so that I can fulfil my process requirements.

🔑 As an Agreement Process Creator, I want to be able to configure the “Identify” step in my workflow, so that I can fulfil my process requirements.

Module name ?

Configure step

To configure this step, lorem ipsum dolor sit amet, consectetur adipiscing elit.

Not configured

Configure

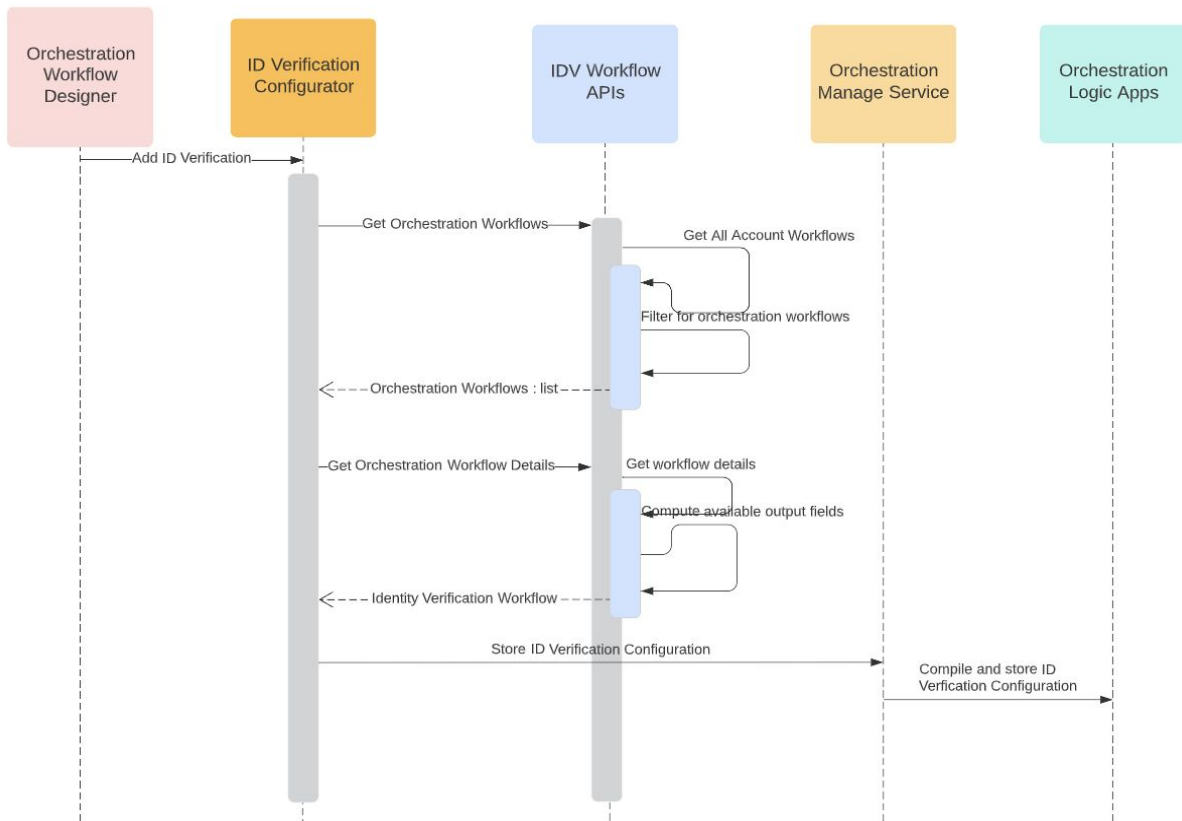

Step Name	Identify
Step Participant	Workflow Participant
Role	Patient

Identify Configuration	DocuSign ID Verification
Description	Photo ID/Passport, KBA, or eID
Participant Full Name	Patient.Full Name
Participant Email	Patient.Email
Participant Phone Number	Patient.Phone Number

Step Name	Identify
Step Participant	Map from previous step
Select Previous Step	Web Form

Identify Configuration	DocuSign ID Verification
Description	Photo ID/Passport, KBA, or eID
Participant Full Name	
Participant Email	
Participant Phone Number	

Configurator - Technical Details

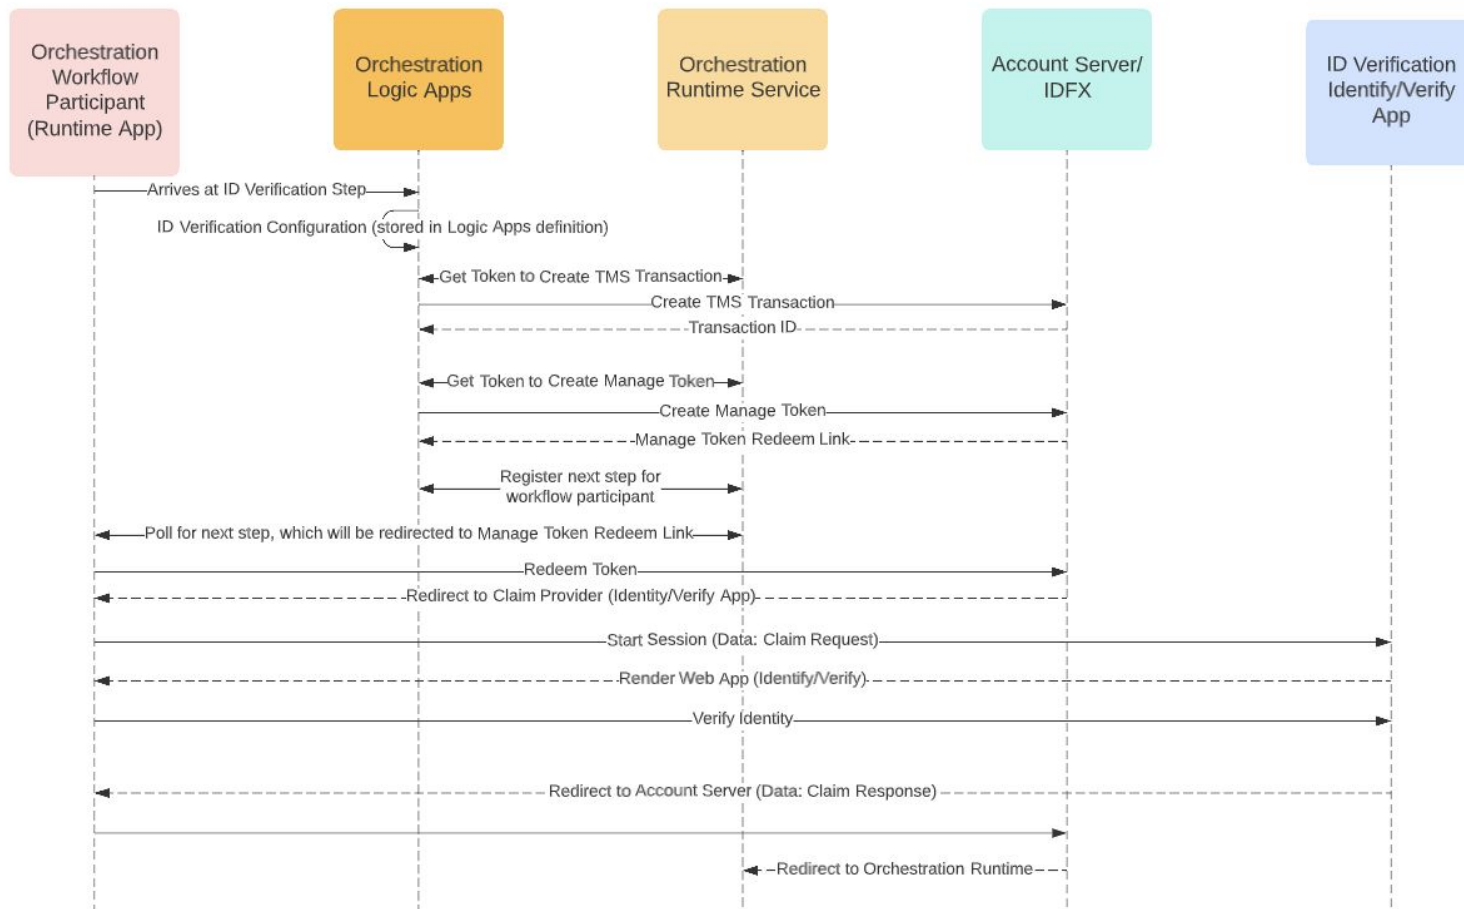

Details

Two APIs will be created for configurator:

1. **Listing API** will retrieve the list of all existing identity workflows (applicable to Orchestration)
 - a. Workflows which have “Manual Review” or “SMS Reauthentication” will be filtered out
2. **Details API** will retrieve the configuration of the selected workflow along with the output data available

Run-time Flow - Technical Details

What will we deliver by Momentum?

- **Configuration of Identify Workflows for Agreement Orchestration**
- **Ability to configure Identify Step in Orchestration Workflow Designer**
 - Exposing the configured Identify Workflows
 - Ability to map outputs of previous step or process participants to the inputs required for Identify
 - Expose the outputs available for the selected Identify Workflow
 - Ability to use the outputs of the selected Identify Workflow in the subsequent steps
- **Ability for the Orchestration Workflow instance to invoke the Identify flow**
- **Providing the “Identify” status and outputs to the Orchestration Workflow instance**

Current Status

 Functional Requirements (Momentum) - Finalized and agreed upon

 Technical Design Specification (Momentum) - Finalized and agreed upon

 Momentum Development in progress

Beyond Momentum 2023 /Open Questions

- ? Billing of “Identify” events in context of Agreement Orchestration (completed for 2024 GA)
- ? Reporting requirements for Agreement Orchestration with respect to Identify
- ? Ability to brand/customize Identify Experience for Agreement Orchestration Workflow (completed for 2024 GA)
- ? ID Evidence - Storing the ID Evidence within Agreement Orchestration
- ? Identify in pure extraction context (Completed for 2024 GA)
 - Process participant uploads an ID Document
 - No other inputs provided
 - Identify will extract the information from ID Document, such as address, country, etc., and pass it to the next step.
- ? Digital Signature -

Why Identify + Agreement Orchestration?

What we wanted to deliver by Momentum 2023?

- ✓ **Configuration of Identify Workflows for Agreement Orchestration**
- ✓ **Ability to configure Identify Step in Orchestration Workflow Designer**
 - Exposing the configured Identify Workflows
 - Ability to map outputs of previous step or process participants to the inputs required for Identify
 - Expose the outputs available for the selected Identify Workflow
 - Ability to use the outputs of the selected Identify Workflow in the subsequent steps
- ✓ **Ability for the Orchestration Workflow instance to invoke the Identify flow**
- ✓ **Providing the “Identify” status and outputs to the Orchestration Workflow instance**

What else we added to the scope for Momentum?

Ability to brand/customize Identify Experience for Agreement Orchestration Workflow

Identify in pure extraction context

- Process participant uploads an ID Document
- No other inputs provided
- Identify will extract the information from ID Document, such as address, country, etc., and pass it to the next step.
