Dear Mr. Khare:

The manuscript entitled "Which way to go? Archetypes to successfully drive LCDP adoption" has been submitted to IEEE Access. Since your expertise is relevant to this article, we would be grateful if you would consider reviewing it.

The abstract appears at the end of this letter, along with the names of the authors. Please let me know within 2 days if you will be able to accept my invitation to review. If you agree to review, we ask that you provide your review comments within **7 days** to assist IEEE Access in maintaining its expedited peer review process of 4 to 6 weeks. If you are interested in reviewing but need additional time to complete the review, we can grant a reasonable deadline extension upon request. For additional information on IEEE Access and tips on completing a quality review, please visit our [Reviewer Best Practices guide](#).

After completing the review, you can easily receive credit on your Publons profile.

As a reviewer, you will need to provide an Accept or Reject recommendation with comments.

When reviewing the article, keep in mind the following IEEE Access qualities:

1. The article must be technically sound.
2. The article must be original writing that enhances the existing body of knowledge in the given subject area. However, review articles and surveys are acceptable if they add value, even if new data/concepts are not presented.
3. Applied research articles are acceptable if they are useful to the engineering community on how to demonstrate a technology that may not be novel.
4. The references that are provided must be applicable and sufficient.
5. The title is applicable and appropriate.

To reply to this reviewer invitation, please click the link below to register with our online manuscript review system, or you may email me with your reply. If you are unable to review at this time, I would appreciate your recommendation for another expert reviewer.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

Agreed: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=2e0f84439f63444db12ca9ee06365adb

Declined: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=64778e9935c44763942deaef56393b34

Once you accept my invitation to review this manuscript, you will be notified via email with directions on how to access the manuscript and the reviewer instructions in the Reviewer Center.

Thank you for your assistance with the peer review of this IEEE Access article.

Sincerely,

Prof. Derek Abbott
Editor-in-Chief, IEEE Access
ieeeaccess2@ieee.org

MANUSCRIPT DETAILS

TYPE: Applied Research

TITLE: Which way to go? Archetypes to successfully drive LCDP adoption

AUTHORS: Käss, Sebastian; Strahringer, Susanne; Westner, Markus

ABSTRACT: Organizations are increasingly adopting Low Code Development Platforms (LCDPs) to develop applications within budget and time constraints. To explain the adoption of LCDPs in application development projects, academic research distinguishes three adoption archetypes (i.e., IT Resource Shortage Mitigators, Application Development Democratizers, and Synergy Realizers) and one archetype for the non-adoption (i.e., Intricacy Adversaries). However, there is a research gap in how practitioners can use these insights to increase the chances for a successful LCDP adoption. Thus, in this practitioner-oriented paper we use a multiple mini case study with 36 cases to present situations in which these archetypes materialize, identify their advantages while also reflecting upon potential disadvantages. Moreover, to better illustrate these situations we present a case vignette for each archetype. Additionally, based on these findings, we derive 12 good practices that managers can follow for adopting LCDPs.

Per Section 8.2.1.C.4 of the IEEE PSPB Operations Manual, information contained in an article under review is confidential and shall not be shared with others, nor shall reviewers use non-public information contained in an article to advance their own research or financial interests.

Per Section 8.2.2.A.2 of the IEEE PSPB Operations Manual, all editors and referees shall immediately DECLINE from review of articles in which there exists a conflict of interest.

If you have any questions, please contact the article administrator: Mr. Devendra Yadav d.yadav@ieee.org. In addition, if you would like to get a certificate after completing this review, please send an email to ieeeaccess@ieee.org.
