Dear Mr. Khare:

Recently you reviewed an article submitted to IEEE Access entitled, "What is happening in product obsolescence management? – Three decades review from 1993 to 2023". Please note that this article was rejected, and the authors were asked to update their article based on the reviewers' concerns.

The authors have resubmitted their revised article and supplied a "list of updates" that highlights all edits made, as well as their responses to the previous reviewers' concerns.

We would appreciate if you could take another look at this improved version to determine if your concerns have been addressed, and to ensure that you are satisfied with the updates.

After completing the review, you can easily receive credit on your Publons profile.

For additional information on IEEE Access and tips on completing a quality review, please visit our [Reviewer Best Practices guide](#).

To reply to this reviewer invitation, please click the link below to register with our online manuscript review system, or you may email me with your reply. If you are unable to review at this time, I would appreciate your recommendation for another expert reviewer.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

Agreed: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=dc9aa5255ac848349ac5199102582096

Declined: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=539c1d0d23744b5b8d0cbf63725befd0

Once you accept my invitation to review this manuscript, you will be notified via email with directions on how to access the manuscript and the reviewer instructions in the Reviewer Center.

Thank you for your assistance with the peer review of this IEEE Access article.

Sincerely,

Dr. Wei Wei
IEEE Access Associate Editor

TITLE: What is happening in product obsolescence management? – Three decades review from 1993 to 2023

AUTHORS: Liu, Yan; Zolghadri, M.

ABSTRACT: All products are likely to be influenced by obsolescence. The consequences can be serious since an obsolete part or component could raise issues in terms of cost, production, safety, and maintenance. To minimize the impact, strategies must be implemented throughout the product's intended life, such as upgrades, monitoring, and

forecasting. This research reviews 188 papers on product obsolescence management published in the past three decades to understand the proposed strategies. Two research questions are addressed: (1) what is the academic landscape of product obsolescence management? (2) what are the main research topics and how are these topics covered by the literature? A bibliometric analysis is firstly conducted to comprehend the distribution of these papers, identify productive authors, and highlight frequent keywords. These papers are then analyzed under seven topics, i.e., general management, upgrade and replacement, mitigation, monitoring, forecasting, design refresh and strategy, and obsolescence impacts. This research fills the gap of lacking an up-to-date overview of works in product obsolescence management, providing insights to enhance the understanding and advancement in the field. The literature review highlights the key approaches and performed actions for each topic. It also reveals that existing studies address a range of products, with attention to software obsolescence. Cost, as a critical factor, drives various cost model-based management strategies. The studies also highlight the need to consider multiple key aspects when implementing these strategies. Despite considerable research on different strategies, challenges remain in developing a long-term vision and techniques for obsolescence management, predicting obsolescence, integrating strategies, and addressing the diverse impacts across industries. Limited research has explored how to identify the most appropriate approach or performed action, and further studies are needed to develop new methods and techniques to manage obsolescence and also to provide systematic guidance for implementing obsolescence management strategies.

Per Section 8.2.1.C.4 of the IEEE PSPB Operations Manual, information contained in an article under review is confidential and shall not be shared with others, nor shall reviewers use non-public information contained in an article to advance their own research or financial interests.

Per Section 8.2.2.A.2 of the IEEE PSPB Operations Manual, all editors and referees shall immediately DECLINE from review of articles in which there exists a conflict of interest.

If you have any questions, please contact the article administrator: Ms. Suhasini Das das.suhasini@ieee.org. In addition, if you would like to get a certificate after completing this review, please send an email to ieeeaccess@ieee.org.
