Dear Mr. Khare:

The manuscript entitled "Improving Learning Management System Performance: A Comprehensive Approach to Engagement, Trust, and Adaptive Learning" has been submitted to IEEE Access. Since your expertise is relevant to this article, we would be grateful if you would consider reviewing it.

The abstract appears at the end of this letter, along with the names of the authors. Please let me know within 2 days if you will be able to accept my invitation to review. If you agree to review, we ask that you provide your review comments within **7 days** to assist IEEE Access in maintaining its expedited peer review process of 4 to 6 weeks. If you are interested in reviewing but need additional time to complete the review, we can grant a reasonable deadline extension upon request. For additional information on IEEE Access and tips on completing a quality review, please visit our [Reviewer Best Practices guide](#).

After completing the review, you can easily receive credit on your Publons profile.

As a reviewer, you will need to provide an Accept or Reject recommendation with comments.

When reviewing the article, keep in mind the following IEEE Access qualities:

1. The article must be technically sound.
2. The article must be original writing that enhances the existing body of knowledge in the given subject area. However, review articles and surveys are acceptable if they add value, even if new data/concepts are not presented.
3. Applied research articles are acceptable if they are useful to the engineering community on how to demonstrate a technology that may not be novel.
4. The references that are provided must be applicable and sufficient.
5. The title is applicable and appropriate.

To reply to this reviewer invitation, please click the link below to register with our online manuscript review system, or you may email me with your reply. If you are unable to review at this time, I would appreciate your recommendation for another expert reviewer.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

Agreed: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=8bb9a196784d45f0aa44cf8b96a62db2

Declined: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=d9efb882768d4eaa8d1b2744688ffd8

Once you accept my invitation to review this manuscript, you will be notified via email with directions on how to access the manuscript and the reviewer instructions in the Reviewer Center.

Thank you for your assistance with the peer review of this IEEE Access article.

Sincerely,

Prof. Derek Abbott
Editor-in-Chief, IEEE Access

MANUSCRIPT DETAILS

TYPE: Research Article

TITLE: Improving Learning Management System Performance: A Comprehensive Approach to Engagement, Trust, and Adaptive Learning

AUTHORS: Almusfar, Latifa Abdullah

ABSTRACT: This study investigates the key factors influencing the performance of learning management systems (LMS) with a focus on user satisfaction and loyalty. The research examines how elements such as user engagement, trust, adaptive learning, system quality, information quality, and service quality impact the overall effectiveness of LMS platforms. We employed a quantitative approach using structural equation modeling (SEM) to analyze data collected from 266 university students actively using an LMS. The results demonstrate that system quality significantly influences user satisfaction, with efficient, reliable systems contributing most to positive user experiences. Similarly, adaptive learning emerged as crucial because it tailors educational content to individual student needs, thereby enhancing satisfaction. Trust in the LMS, particularly in terms of data security, also has a positive impact on user satisfaction, emphasizing the importance of robust security measures. Information quality was found to be relevant and impactful as system-related factors. Service quality showed a minor but significant influence, reflecting the necessity of adequate support services for system functionality. In conclusion, user satisfaction serves as a strong predictor of user loyalty, emphasizing the importance of maintaining high engagement and personalized learning experiences to foster ongoing LMS usage. The study provides actionable insights for LMS developers and educators, highlighting the need to improve system performance, integrate adaptive learning, and prioritize trust to enhance overall user loyalty.

Per Section 8.2.1.C.4 of the IEEE PSPB Operations Manual, information contained in an article under review is confidential and shall not be shared with others, nor shall reviewers use non-public information contained in an article to advance their own research or financial interests.

Per Section 8.2.2.A.2 of the IEEE PSPB Operations Manual, all editors and referees shall immediately DECLINE from review of articles in which there exists a conflict of interest.

If you have any questions, please contact the article administrator: Miss Garima Mongia g.mongia@ieee.org. In addition, if you would like to get a certificate after completing this review, please send an email to ieeeaccess@ieee.org.
