Dear Mr. Khare:

The manuscript entitled "Defining Performance-Shaping Factors in Product Changes: A Systematic Literature Review" has been submitted to IEEE Access. Since your expertise is relevant to this article, we would be grateful if you would consider reviewing it.

The abstract appears at the end of this letter, along with the names of the authors. Please let me know within 2 days if you will be able to accept my invitation to review. If you agree to review, we ask that you provide your review comments within **7 days** to assist IEEE Access in maintaining its expedited peer review process of 4 to 6 weeks. If you are interested in reviewing but need additional time to complete the review, we can grant a reasonable deadline extension upon request. For additional information on IEEE Access and tips on completing a quality review, please visit our [Reviewer Best Practices guide](#).

After completing the review, you can easily receive credit on your Publons profile.

As a reviewer, you will need to provide an Accept or Reject recommendation with comments.

When reviewing the article, keep in mind the following IEEE Access qualities:

1. The article must be technically sound.
2. The article must be original writing that enhances the existing body of knowledge in the given subject area. However, review articles and surveys are acceptable if they add value, even if new data/concepts are not presented.
3. Applied research articles are acceptable if they are useful to the engineering community on how to demonstrate a technology that may not be novel.
4. The references that are provided must be applicable and sufficient.
5. The title is applicable and appropriate.

To reply to this reviewer invitation, please click the link below to register with our online manuscript review system, or you may email me with your reply. If you are unable to review at this time, I would appreciate your recommendation for another expert reviewer.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

Agreed: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=caa72a2e69c34acc87850f5a4174d3d4

Declined: https://mc.manuscriptcentral.com/ieee-access?URL_MASK=b7271dc05d3c409bb932a29aa2d266f4

Once you accept my invitation to review this manuscript, you will be notified via email with directions on how to access the manuscript and the reviewer instructions in the Reviewer Center.

Thank you for your assistance with the peer review of this IEEE Access article.

Sincerely,

Prof. Derek Abbott
Editor-in-Chief, IEEE Access

TITLE: Defining Performance-Shaping Factors in Product Changes: A Systematic Literature Review

AUTHORS: Mordaschew, Viktoria; Latos, Benedikt

ABSTRACT: Product changes depend highly on product developers' reliability since errors cause rework and increasing costs. To increase the reliability of product developers in product changes, a forecasting model is required that enables companies to predict the reliability of developers prospectively based on individual real-time data. However, the performance-shaping factors (PSFs) must first be identified to develop such a model. Consequently, there is a need to understand which factors influence and affect their reliability in product changes. Therefore, this article presents relevant PSFs and a categorization for them regarding the work system of engineering change process. The PSFs are retrieved from literature based on a systematic literature review. Overall, 18 PSFs were identified, which have an effect on product developers. Further, the current research gap is identified from the literature and current gaps are presented. The relations between PSFs and how they affect each other are currently not analyzed in literature.

Per Section 8.2.1.C.4 of the IEEE PSPB Operations Manual, information contained in an article under review is confidential and shall not be shared with others, nor shall reviewers use non-public information contained in an article to advance their own research or financial interests.

Per Section 8.2.2.A.2 of the IEEE PSPB Operations Manual, all editors and referees shall immediately DECLINE from review of articles in which there exists a conflict of interest.

If you have any questions, please contact the article administrator: Dr. Manpreet Kaur m.kaur@ieee.org.
In addition, if you would like to get a certificate after completing this review, please send an email to ieeeaccess@ieee.org.
